

Mandate

We connect youth movements, donors, researchers, and implementing organisations to support institutional and systemic changes in Youth Partnership. We aim to foster partnerships that are grounded in youth-centeredness, intersectionality, collaboration, and shared accountability. This is done through:

Action Learning & Capacity-Building

Evidence, Research & Knowledge Management

Outreach & Influence

Strategic Partnerships

Mission

The YIELD Hub's mission is to put young people at the heart of decisions and programmes relating to their sexual and reproductive health and rights. While our work focuses on AYSRHR, we also work on youth partnership in issues relating to education, livelihoods and climate change.

Values

Youth-centeredness: We apply youth-partnership approaches in our own governance, activities, and operations.

Intersectionality: We address the reality that multiple inequalities combine to disadvantage young people; we address a broad range of issues influencing AYSRHR outcomes, including climate, education and livelihoods.

Collaboration & Co-creation: We work with young people and others to co-create learning solutions; we believe that process is as important as product in the design and activation of youth-serving products and services.

Accountability: We work with duty-bearers to ensure institutional and systemic change that support meaningful youth participation and partnership practices. We hold ourselves and our partners accountable for what we have promised.

Our Work Includes

- ✓ Driving meaningful and inclusive youth partnership in governance and funding mechanisms
- ✓ Supporting donors to meet their youth partnership commitments
- ✓ Developing tools, models, and standards for effective intergenerational partnerships
- ✓ Generating evidence and disseminating research through the Action Learning Model to support norm, institutional, and systemic changes within the AYSRHR field.
- ✓ Facilitating cross-movement, global, and regional collaboration through action learning to deepen knowledge and strengthen capacity.

To deliver on these priorities, YIELD Hub organises its programming into four key workstreams:

Action Learning & Capacity-Building

Strengthening the capabilities of youth and institutions through collective problem-solving and capacity building.

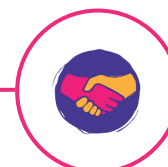

Evidence, Research & Knowledge Management

To generate and disseminate evidence, tools and new norms to strengthen the field of AYSRHR.

Outreach & Influence

Amplifying youth-focused approaches through strategic advocacy, digital platforms, and engagement in global processes.

Strategic Partnerships

Building collaborations that tackle structural barriers and expand the reach and sustainability of our work.
